SKILLS

`React` `Node.js` `JavaScript` `CSS3` `Redux` `SQL` `HTML5` `SASS` `ChartJS` `Nodemailer` `Firebase`

PROJECTS

Sugarboy Donuts ↗

- Individual Project – www.lekkerdonuts.com
- Technology used: React, JavaScript, Node.js, SQL, Nodemailer, ChartJS, CSS3, HTML5, SASS, Stripe, MaterialUI, bcrypt, and Express.
- Web application for a small business donut shop, that includes both e-commerce store and admin portal.
- Utilized bcrypt to hash passwords in SQL database to ensure password protection.
- Fully responsive to different screen sizes.
- Project completed in 2 weeks.

First Night Out ↗

- Group Project – www.firstnightout.fun
- Technologies used: React, JavaScript, Node.js, CSS3, HTML5, Firebase, Express
- Mobile based application supplies grouped activities called 'routes' that provide a day of fun activities for the user.
- Worked with Google API (Places, Geocoding, and Directions)
- Used bcrypt to hash passwords in firebase.
- Worked as a team using GitHub for version control.
- Held daily standup meetings and underwent code review prior to pull requests.
- Created end point tests using Postman, and some unit tests.
